Issue No. 102 – September 2005

Hello and welcome to Skywaves 102.

FMLIST, until now only available in PDF format, goes online on the Internet. It is now powered by a relational database with a web frontend. FMLIST now is a unique web-based database collaboration project - anyone can share and participate!

Here are some features of the new platform:

- The database is now edited online by dedicated editors - changes and amendments are available in real time.
- Users can search, filter, display and sort data to their needs.
- Registered users may report changes to FMLIST data - in this way, every user can easily contribute to improve data quality. The editors will apply such changes to the database.
- Multiple editors per country are possible.
- Transmitter sites (locations) are kept in a separate table for reduced redundancy and easier editing.
- Full source and details of all modifications are available online.
- Free online read/search access to everybody.
- Free PDF download for everybody.
- For registered users: Download data for offline usage, generate RSDSX data files, upload sound files (recordings) or transmitter site photos.
- Multilingual user interface: German, English, Italian already available, other languages still need translation.

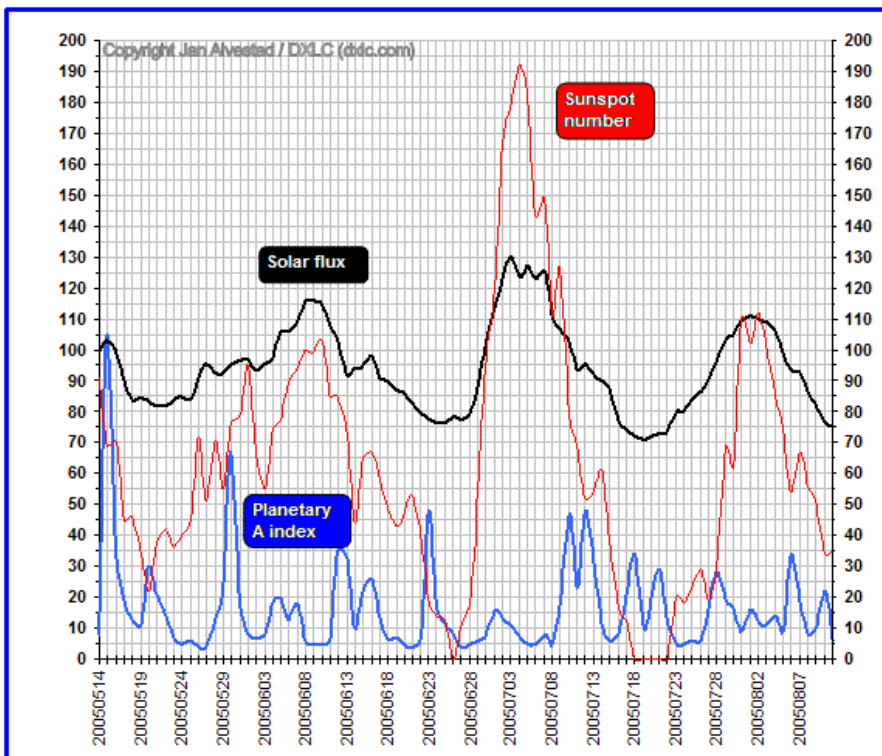

How to start:

http://www.myradiobase.de/fmlist/ul_login.php - Select your preferred language and click "Not registered?" to register. Your registration request will be processed within 24 hours. In the meantime, you can "continue as guest".

FMLIST is and will be non-commercial. It has even more potential - go, find out and share your news!

Please support this project - I hope it will contribute towards "better data, less double work, more time for listening"!

Ofcom advertises new FM commercial radio licence for Shrewsbury

Ofcom today (4/8/2005) advertises a new local FM commercial radio licence to cover the town of Shrewsbury and the surrounding area.

Ofcom estimates that this licence could achieve coverage of an area with an adult (aged 15+) population of between 100,000 and 120,000. The exact coverage will be determined by the location of the transmission site and other technical characteristics. The proposed frequency for this licence is subject to international agreement on radio spectrum usage.

The closing date for the receipt of applications is 3.00 p.m. on Monday, 7 November 2005. A non-refundable fee of £5,000 will be payable for each application submitted.

The licence will be issued for a twelve year period. All applications for this licence will be published on the Ofcom website as soon as is practicable after the closing date.

Ofcom welcomes the views of the public about the local radio needs of listeners in this area and the types of services required. Opinions on these issues can either be emailed to commercialradio@ofcom.org.uk or posted to Neil Stock, Head of Radio Planning & Licensing, Ofcom, Riverside House, 2a Southwark Bridge Road, London SE1 9HA.

Membership: Skywaves is published monthly as an electronic e-zine, which can be downloaded by members via the Internet and read/printed on a computer using Adobe Acrobat Reader.

Subscriptions to the British FM & TV Circle, who publish Skywaves, now run from January to November/December, and are free.

There is also no charge by the BFMTVC to join the early DX warning system.

The Deadline for sections is the **1st of the month**, unless otherwise stated. Skywaves is currently compiled using Microsoft Word 98 for Mac. Electronic contributions can be sent in this, or any other Word format, as RTF, plain text, or as text within an e-mail. Written contributions are also welcomed, typed if possible. They should be sent to the relevant section editor by post or e-mail, or to the main address on the front page of Skywaves. Note – "On Screen" deadline is usually the 25th of the month.
